

OUTDOOR WATER USE REPORT

May 19, 2020

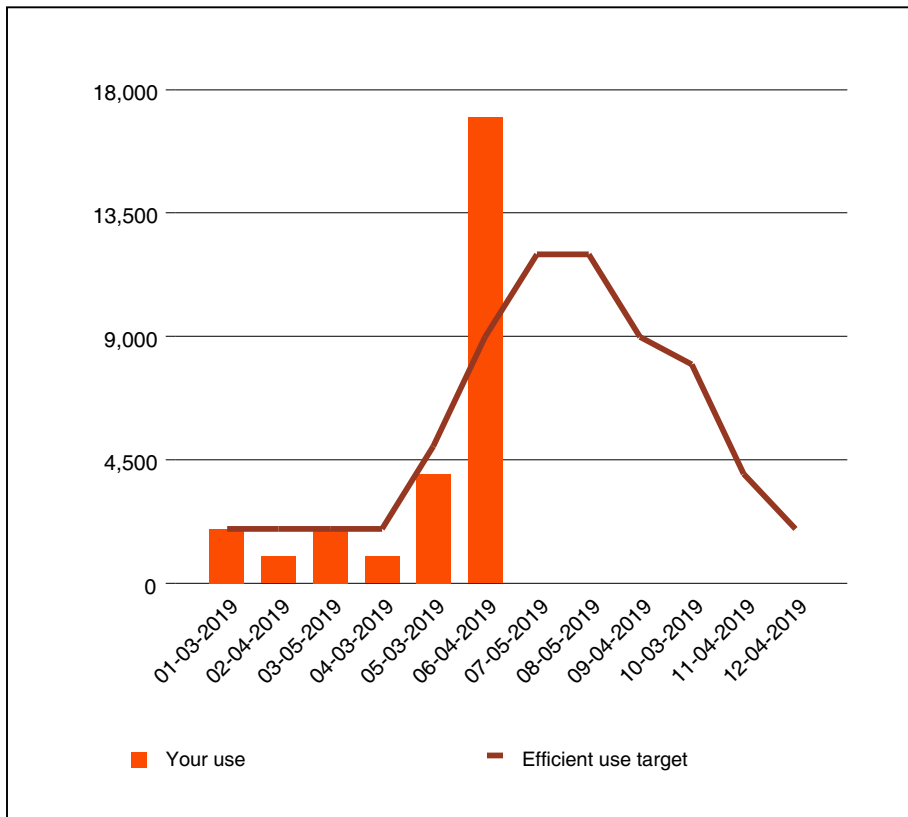

This month you were **8,000** gallons **over** your monthly efficiency target.

Your Efficiency Target

The monthly target for your home is based on a measurement of **4,019 square feet** of landscape.

By staying under the monthly efficiency target each month, you will use 12 gallons of water per square foot of landscape annually, which is considered efficient in Denver's climate.

Personalized for

9663 S DUDLEY WAY
LITTLETON, CO 80127-8522

Denver Water is committed to helping you be efficient with your outdoor water use. We hope this report empowers you to take action and use water wisely.

How to read this report

Your household: This is your household's monthly water use. You can find this same consumption data on your bill.

Efficiency Target: To calculate your efficiency target, we created a monthly water budget using 12 gallons per square foot of your landscape. Water is allocated based on plant needs for each month and is added to the average winter consumption from your bill.
