

GROSS RESERVOIR EXPANSION PROJECT

Permanent Recreation Pre-Proposal Information Session

Denver Water invites landscape architects to attend a virtual information session on its permanent recreation design project at Gross Reservoir.

The Gross Reservoir Expansion Project will raise Gross Dam 131 feet, almost tripling the storage capacity of the reservoir.

Denver Water is seeking a landscape architect to aid in the planning and design of permanent recreation features, which will be constructed post-dam raise.

Denver Water will be hosting a virtual presentation prior to releasing a Request for Qualifications (RFQ) in the Fall of 2024. The virtual presentation will cover:

- Project background and major scope items.
- Denver Water's contracting and procurement process and timeline.
- Preferred contractor qualifications.

Virtual Presentation Date

Sept. 25 at 1 p.m.

Please contact Garrett Chesonis at
Garrett.Chesonis@DenverWater.org
to RSVP.

Please note that attending the virtual presentation is not required to respond to the RFQ but is highly recommended.
