ABOUT THE PROJECT

Construction is underway on the North System Renewal Project, a critical update to Denver’s northern infrastructure. Denver Water’s North System brings snowmelt from the mountains through reservoirs, pipelines and a treatment plant to produce clean, great-tasting drinking water. Denver Water is upgrading and modernizing the northern portion of our water system. We are building a new water treatment plant, installing a new pipeline and redeveloping our Moffat Treatment Plant. When finished, the system will be more resilient and adaptable to changing demands for water now and into the future.

Northwater Pipeline construction details

This project involves installing the new Northwater Pipeline, a 66-inch diameter pipeline replacing one of the two existing pipelines running 8.5 miles between Ralston Reservoir and the Moffat Treatment Plant. The new pipeline will transport treated water from the new Northwater Treatment Plant to the Moffat Facility for distribution. The project will cost $80 million and work will be completed in three phases.

PROJECT PHASES & WORK HOURS

West Phase
Construction will take place from summer 2018 through spring 2019

Central Phase
Construction will take place from early 2019 through summer 2020

East Phase
Construction will take place from early 2021 through spring 2022

Hours for construction will generally occur Monday through Saturday between the 7 a.m. and 7 p.m. Crew schedules in each location may vary on a day-to-day basis. Construction timelines are subject to schedule change based on weather, adjustments and the availability of equipment and materials.

Central phase expected to be completed in 2020

Central phase construction of the Northwater Pipeline will consist of installing 2.8 miles of the 8.5-mile pipeline from the north side of West 44th Avenue, east of Indiana Street, to Denver Water’s Van Bibber facility located on West 60th Avenue. Denver Water’s contractor, S.J. Lewis Construction, began construction in spring 2019 with anticipated completion of the central phase in summer 2020.

Starting in March 2020, crews will begin open trench work in Fairmount, Jefferson County for the Northwater Pipeline. Crews will cross over four canals and cross over four roads to install the pipeline. More project details can be found at denverwater.org/northsystemrenewal.
