

# LEAD REDUCTION PROGRAM

## SERVICE LINE SECTIONS - BEFORE REPLACEMENT

- 1 Service lines bring water to your home from the water main.
- 2 Older service lines often have multiple sections connected together.
- 3 Some sections may be made of lead, galvanized steel or copper due to partial repairs over the years. If you are in the Lead Reduction Program, Denver Water believes you have at least one section made of lead.

### SERVICE LINE MATERIALS

- Lead
- Galvanized Steel
- Copper
