

WATER WATCH REPORT

February 11, 2019

Supply Reservoir Contents

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full		
	Total	Usable		Current	Last Year	Historic Median
Antero	19,881	19,826	18,922	95%	101%	99%
Eleven Mile	97,779	97,779	99,452	102%	102%	102%
Cheesman	79,064	79,064	60,685	77%	87%	83%
Marston	19,256	13,133	8,314	63%	51%	53%
Strontia Springs	7,863	7,163	6,210	87%	91%	93%
Chatfield	27,076	10,782	10,435	97%	59%	92%
Dillon	257,304	249,095	175,170	70%	94%	90%
Gross	41,811	29,811	14,586	49%	56%	46%
Ralston	10,776	7,276	2,512	35%	49%	56%
Meadow Creek	5,370	4,520	0	0%	26%	12%
Total	566,180	518,449	396,286	76%	90%	81%

Supply Reservoir Contents

Note: Denver Water forecasts seasonal reservoir storage contents under dry future weather, normal future weather and wet future weather scenarios.

February Precipitation

Cumulative Precipitation: South Platte River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper South Platte diversion facilities.

Cumulative Precipitation: Colorado River Watershed

Data are from the 7 SNOTEL stations above Denver Water's Upper Colorado diversion facilities.

Snowpack: South Platte River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper South Platte diversion facilities.

Snowpack: Colorado River Watershed

Data are from the 7 Snotel stations above Denver Water's Upper Colorado diversion facilities.

February 11, 2019

February 1st Forecasted April-July Natural Runoff Volume

Lake Powell Report*

Data are from the 115 SNOTEL stations above Lake Powell located in Colorado, Utah and Wyoming.

Percent of 1981-2010 Average

* Denver Water gets half of its water supply from the Colorado River and closely monitors conditions at Lake Powell and within the greater Colorado River Basin.

February 11, 2019

Denver Water Use and Reservoir Contents 2019													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YTD-Avg
Predicted End-of-Month Supply Reservoir Contents (Full = 518,449 AF)	397,800												
Actual End-of-Month Supply Reservoir Contents (AF)	397,696												
Actual % Full	77%												
Historical Median % Full	81%												
12-17 Avg. Daily Use (MG)	111	110	110	128	169	266	297	282	245	151	109	105	111

	31	110											
Monthly Average	108	109											108
% of 12-17 Avg. Daily Use	97%	99%											98%

Notes: 1) "AF" denotes acre-feet. "MG" denotes million gallons. 2) Expected Daily Use is based on historical use with normal weather conditions. 3) The predicted end-of-month supply reservoir contents figures assume normal weather after December 1, 2018. 4) The differences between predicted and actual end-of-month supply reservoir contents are the result of normal estimation error of daily use, supply, evaporation, carriage losses and raw water deliveries. 5) Predicted supply reservoir contents last updated on February 11, 2019. 6) Daily water figures are subject to change.
